

CHEMICAL PROCESSING

The Gold Series® cartridge dust and fume collector combines enhanced performance with ease of service while cleaning the work environment of irritating dust and fumes.

Stainless Steel High Vacuum (HV) Gold Series®

The Gold Series® has proven itself to work very well in chemical processing applications such as paint pigments, agricultural dry chemicals and especially toxic materials. Pesticides and insecticides are common and dangerous materials to capture in a dust collector.

Application Focus

CHEMICAL PROCESSING

SAFE AIR FOR A SAFE WORK ENVIRONMENT

GS16 on Zinc Arc Spray

The Gold Series® array of options includes a bag-in, bag-out methodology to replace dirty filters while completely isolating the worker from the hazardous chemicals. From ingestible powdered drugs to mouse poisons, the Gold Series® has worked on these applications where most other dust collectors have failed.

Three GS6's on Yellow Paint Pigment

Key benefits:

- High filtration efficiency
- Excellent energy performance
- Long element life

Gold Cone™ Cartridge

Camfil Farr **HemiPleat®** cartridges have an expanded capacity due to the patented inner Gold Cone™. This inner cone increases media area and provides uniform dispersion of back-pulsed air. It also opens up more useable space for air flow in the filter.
